Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet) This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:			
		because they relate to subject matter not required to be searched by this Authority, namely:	
2.		Claim Nos.:	
		because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:	
	-		
3.		Claim Nos.:	
		because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

PCT/US03/25041

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, daims 1-8 and 14-18 drawn to a power supply system.

Group II, claims 9-13, drawn to a method of charging a metal-air converter.

Group III, claims, 19-21, drawn to a method of propelling a vehicle.

Group IV, claims 22-25, drawn to an electrically-powered vehicle.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and IV do not include the step of converting the metal oxide back to the metal as do the Group II and III claims. Group I comprises a generator which is not part of claims of Group IV. In addition, the Group IV vehicle must have the capacity to travel over 300 miles, which limitation is not part of the Group I system. Finally, Groups II and III are different because Group II is drawn to a method of charging a converter while Group III is directed to a method of propelling a vehicle; two materially different processes requiring different steps.
